ABSC 599

Applied Behavioral Science - Hnr&Thsis Appld Bhvrl Science (1-5 / Honors / AE61 / S)

A two-semester course combining small group discussions of selected, advanced topics in applied behavioral science with honors thesis supervision on a project of the student's own design. Students normally enroll for one or two hours in fall semester and three to five hours in spring semester. (Formerly HDFL 496.)

Prerequisite: ABSC 304, ABSC/HDFL 308, and instructor permission.

Satisfies: Goal 6 Outcome 1 (AE61) , S Social Science (S) , Honors

ABSC 691

Applied Behavioral Science - Prc Commnty Health&Devlpmnt,Hn (1-6 / Honors / AE61 / U)

A two-semester practicum in which students engage in structured opportunities to practice core competencies related to the work of promoting community health and development (e.g., strategic planning, intervention, evaluation). In weekly group meetings, students prepare for their individual working field settings (e.g., health and human service agencies, research and advocacy organizations, community organizations). (Formerly HDFL 692). Prerequisite: Open only to students in the University Honors Program; ABSC/HDFL 151, ABSC/HDFL 311 and instructor permission.

BIOL 360

Biology - Principles of Genetics, Honors (4 / Honors / N)

The science of genetics aims to explain why individuals differ from one another and how these differences are inherited. Honors Genetics covers all core topics in fundamental genetics: Mendelian inheritance, meiosis and recombination, mutation, molecular genetics, population genetics, quantitative genetics and genomics. Special attention given to the practice of genetics and the complex relationship between genotype, phenotype and environment. A broader goal of Honors Genetics is to provide students a framework for understanding recent advances in medical genetics and the modern era of personal genomics. Prerequisite: CHEM 135 or CHEM 175 or CHEM 195 with a grade of C- or higher and BIOL 150 or BIOL 151 with a grade of C- or higher and BIOL 152 or BIOL 153 with a grade of C- or higher and membership in the University Honors Program; or consent of the instructor.

C&PE 661

Chemical & Petroleum Engr - Undergraduate Honors Research (1-3 / Honors)

This course involves the investigation of a particular problem in the field of chemical or petroleum engineering. C&PE 661 should be taken, rather than C&PE 651 for students seeking Departmental Honors in Chemical Petroleum Engineering. C&PE 661 may also be used by students in the Honors Program to help satisfy the course requirement of this program. The design or research topic is identified jointly by the student and faculty research supervisor. Prerequisite: C&PE 121 or C&PE 325; C&PE 211; C&PE 511; C&PE 512; C&PE 522; overall GPA >3.5; and engineering GPA >3.5; or consent of the instructor.

CE 312

Civil & Envr Engineering - Strength of Materials, Honors (4 / Honors)

Three one-hour lectures and one two-hour laboratory. Principles of stress and strain in deformable bodies under load. Prerequisite: CE 201 or ME 201 or ME 211 or CE 301, ENGL 102 or ENGL 105 or consent of instructor. Corequisite: MATH 220.

EECS 169

Elect Engr & Computer Science - Programming I: Honors (4 / Honors)

Problem solving using a high level programming language and object oriented software design. Fundamental stages of software development are discussed: problem specification, program design, implementation, testing, and documentation. Introduction to programming using an object oriented language: using classes, defining classes, extending classes. Introduction to algorithms and data structures useful for problem solving: arrays, lists, files, searching, and sorting. Students will be responsible for designing, implementing, testing, and documenting independent programming projects. Professional ethics are defined and discussed in particular with respect to computer rights and responsibilities. This course is intended for highly motivated students and includes honors-level assignments. Prerequisite: Corequisite: MATH 125 or MATH 145, plus either acceptance into the KU Honors Program or consent of instructor.

EECS 498

Elect Engr & Computer Science - Honors Research (1-2 / Honors)

Arranged to allow students to satisfy the independent research requirement for graduation with departmental honors. Prerequisite: Consent of instructor and upper-level EECS eligibility.

ENGL 105

English - Freshman Honors English (3 / Honors / GE21 / U)

Study of significant works of world literature. The primary aims are to develop reading and writing skills and to introduce the students to works of literature drawn from a variety of genres and historical periods. Prerequisite: An ACT score of 31-36, or an SAT score of 650 or higher, or an AP exam score of 3 on either the

Literature and Composition exam or the Language and Composition exam, or membership in the University Honors Program.

History - Honors Course in History (3 / AE61 / H)

This course is the first part of a two-part course that provides a group setting for writing the Senior Honors Thesis, which is a substantial work of historical research based above all on the analysis of primary sources. During this first semester students must produce a serious working draft of the thesis. Assignments and discussions will help students to prepare this draft, which will establish a solid foundation for the Honors Thesis. In addition, this course will provide a close experience of advanced, professional, historical work. Presentations, weekly comments on the work of others, and active participation in seminar discussions with constructive observations and questions will complete that professional experience. A History faculty advisor will provide essential guidance throughout the process of writing the thesis. Prerequisite: HIST 301 and permission of instructor.

Exploring the American Legal System - In the United States, our courts play a unique role in resolving private and political disputes. In this tutorial, students will learn about the U.S. legal system and the role lawyers play in that system. Students will spend the first portion of the term learning the basic elements of legal reasoning and argumentation in a law-school, Socratic-method environment. During the remainder of the term, students will brief and orally argue several cases. Topics will range from constitutional law to legislation to the common law, providing the students with an introduction to the breadth of our legal system. Students not arguing in any given week will serve as judges of the court, asking questions of counsel and rendering judgments of the court. Readings will be almost entirely case-law based and delivered to students electronically after the first day of class.
